

Schedule

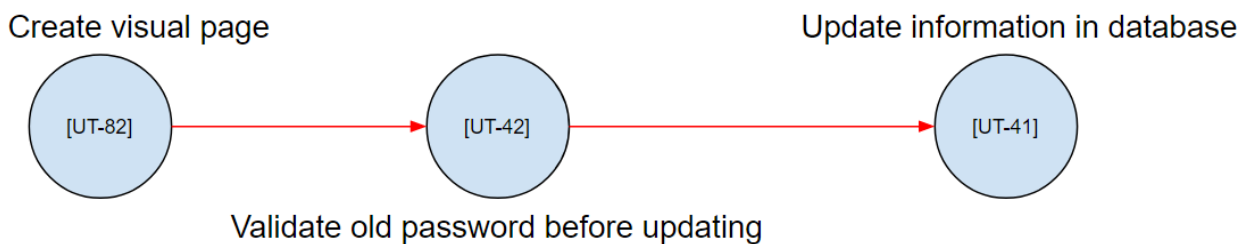

[UT-18] Create a “forgot password” feature for users who forget their password

[UT-10] Search for listing

[UT-4] Update my password

In our network diagram, the red arrows represent the critical path for each user story that we accomplished within our sprint. Each respective critical path of the user stories follow a similar pattern that differs only when the number of subtasks increases, as the user story becomes more complex. For the most part, our velocity stayed similar to the velocity of sprint 1, due to blockers

such as other course work. Regardless, we remained vigilant in completing our planned user stories and ensured that our features worked as intended.
