[UT-103] Fix Broken URLs

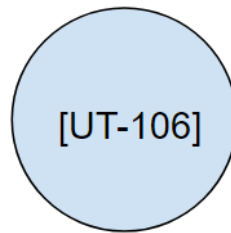

[UT-60] Report User

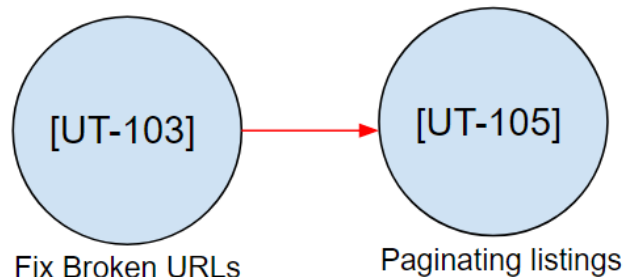

[UT-102] Delete Bookmark

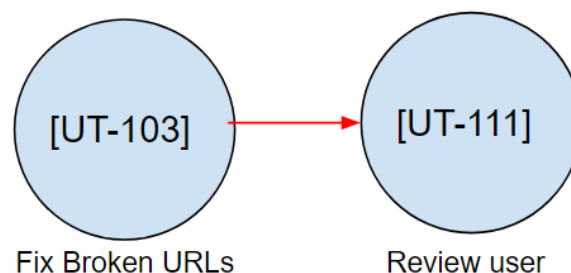

[UT-106] Add resized listing images to bookmarks

[UT-105] Paginating Listings

[UT-111] Review User

We had already finished most of our features by the end of Sprint 3. During this sprint, we primarily focused on fixing visual bugs and linking the URLs. A significant portion of our user stories depended on the user story, UT-103 Fix Broken URLs, as each of the other tasks within the sprint backlog required working URLs to function properly. As such, it was necessary to communicate the changes to the entire team to ensure that these changes were correct and made sense to every developer.. This took a lot longer than anticipated, which lengthened the completion of our remaining stories. Although all the user stories had linear paths, UT-103 was a complicated dependency. Unfortunately, the last sprint occurred at an extremely busy time for the team, but we were able to complete all features.
